

FIG. 1 is a perspective view of a container assembly. The assembly includes a cylindrical container body (14) with a flange (16) at the top and a base (19). A lid (28) is hinged to the container body and is shown in an open position. The lid features a circular opening (36) with a gasket (32) around its perimeter. A handle (18) is attached to the lid via a bracket (40) and a ring (24). The handle has a ring (24) at its end. The lid also has a hinge mechanism (38) and a locking mechanism (26) near the opening. The container body has a vertical ribbed texture (19).
